ABBAS KHAN COLLEGE FOR WOMEN

B.A, DEPARTMENT OF GEOGRAPHY

Program Outcome

- PO1. Students will be able to understand the concept, definitions of geography.
- PO2. Principles and theories of geography and man and environment relationship.
- PO3. What data should be collected to represent various statistical methods.
- PO4. It helps to know the location of various countries and their climatic zones
- PO5. Students get the opportunity to work in ISRO, Survey of India Mines & Geology Department.
- PO6. Work in data entry, web designing with the help of geographical grid system.
- PO7. Placement in socio- economic and Geo- political fields.
- PO8. Work as a cartography (manual quill to pen)
- PO9. As the subject deals with the knowledge of earth related to all the subjects, can take up many competitive exams and pass with good percentage.
- PO10. Can get placement in health and hygiene department .related various pollutions.

Course Outcome

1 semester B.A

Subject: Physical geography, part-I- Landforms.

Outcomes:

CO1. Students have the basic knowledge of solar system.

CO2. Theories of origin of the earth, formation of rocks, folds faults, mountains plateaus & plains. Latitudes & longitudes and calculation of time and date

CO3. Causes and distribution of earth quakes and volcanoes and how the various agents of denudation modify the earth surface.

Practical Paper—cartography helps to draw various types of scales, maps, graphs & uses.

2 Semesters

Subject: Physical Geography-II

CO1. Learn how important the layer of gases to the living beings and controls the various weather elements.

CO2. Student learns the types of humidity.

CO3. Features, color, salinity and currents of ocean waters.

Practical Paper — Weather instruments & study Indian daily weather report.

CO1. Learn to use the weather instruments like thermometer, barometer, rain gauge, and wind vane anemometer etc, used to prepare weather report by IMD.

3 Semester

Subject: Human Geography

CO1. Learn the development of human geography, its importance in the field of population, growth, and causes distribution.

CO2. Various schools of thoughts, Man-Environment relationship and types of settlements.

CO3. Learn migration, types, causes and consequences of migration

Practical Paper:- Representation of statistical data

CO4. Learn to use different signs, symbols and methods used in a map for statistical data.

4 Semester- Regional Geography of Karnataka

CO1. Learn location and extent of Karnataka state, physiographic divisions, climate, soils vegetation, important agricultural crops, minerals, population distribution.

CO2. Major river systems and multipurpose projects ports and harbors.

CO3. Developments of industries and modes of transportation and important cities.

Practical Paper:- Map Analysis

CO1. Learn to draw different types of slopes, valleys and interpretation of toposheets with conventional signs and symbols.

5. Semester- paper-v

Subject: Regional Geography of India –I

CO1. Learn location and extent of India, physical features- Himalayas, Indo-Gangetic plain, plateau of peninsular India, coastal plains .administrative boundaries.

CO2. Soils, forest, rivers, multipurpose projects.

Practical Paper: - Map projection-I

CO1. Know the importance of conventional methods of map projections & various steps involved in drawing.

5. Semester- paper-Vi

Subject: Environmental Geography

CO1. Meaning, importance components of environment and ecology & ecosystem.

CO2. Learn biochemical cycles, food chain food web, and biomes.

CO3. Learn pollutions –air, water, noise, soil, their causes and consequences.

CO4. Natural hazards like floods, drought, famines, earth quakes, volcanoes, avalanches, land and rock slides.

Practical Paper:- Basic Statistics.

CO1. Importance, methods of data collection and calculation of data by various methods- mean median, mode and deviations for grouped and ungrouped data.

6. Semester.-paper VII

Subject: Geography of India –II

CO1. Learn causes, growth, density, sex ratio, composition, literacy rate of our nation.

CO2. Important metallic, non-metallic, power resources of India.

CO3. Know the important food crops, industrial crops and major industries and industrial regions.

CO4. Learn the various modes of transportation and developments.

Practical Paper: - Map projection –II

CO1. Learn the methods of Map projections for polar areas and also for whole globe and their uses.

6 .SEMESTER-Papers –VIII

Subject: Economic Geography of the World.

CO1. Learn various approaches of economic geography, major primary activities of the world, soils, minerals, main agricultural crops and natural vegetation of the world.

CO2. Major fishing grounds, animal husbandry and aqua culture of the world.

Major industries, trade routes- land, ocean, air and rail routes of the World.

Practical Paper:- Fundamentals of GIS and Remote Sensing.

CO1. Learn the meaning, components and recent trends in GIS.

CO2. Meaning definitions, stages and applications of remote sensing

CO3. Learn to represent the socio-economic data by various methods-lines, bar, pie and compound bars.
